Energy distribution

Ecological value

Values stated on the datasheet can vary depending on producing factory and natural variations in raw materials. More information and actual values and ingredients, can be found on the label*.

The information on energy distribution and ecological values applies to 4,5 mm

Feed formulation is based on BioMar's Performance Concept. Please visit our website for more information on the Performance Concept and for the product description.

Feeding should be adapted to the chosen production strategy and current farming conditions. Recommended storage of feed is in dry and cool place, protected from direct sunlight and pests.
